

I do not like to block between vrs provider.
I want to get freedom between vrs provider no good to block
between vrs provider. I want the right and freedom to choose any
VRS provider. I don't want to be stuck with just one VRS provider.
I want to call anyone even if they have different equipment, just
like hearing people can.
I want it to be easy to communicate with your friends and families.

Thank you very much
